Light – Anywhere You Need It!

According to your demands and instructions, our graduated engineers and research associates develop highly efficient LED solutions. Any shape, usage or technology is possible. Whether you need a concept, a light design, a color change led or a draft version of a light engine, we will support and consult your ideas – if you wish – from start to finish.

Your Advantages at ECD:

- our location in Dresden combines customized construction with quick transfer to the production plant,
- some of our specialized solutions are also useable outdoors,
- we stand for long-term experiences in the development of LED light sources,
- we offer you reasonably priced series production that is also achievable for customized solutions and small-batch productions,
- by using efficient LED technologies you will save on your energy expenses.

Quality Combined with Tradition

Since 1997, ECD Electronic Components GmbH Dresden has successfully established its position on the global market. We provide services in the fields of customized cable production, circuit board assembly, LED solutions as well as telematics. The development and manufacturing of customer's orders and our own innovative products takes place on 5,000 square meters of floor area with our modern and high-performance machinery.
